

The entrance construction is an eye catcher, guiding visitors towards the entrance. It creates a first impression of the [event](#) and greets visitors with a warm welcome.

At large events like pop festivals the entrance construction is also essential for dosing the flow of people. They can be categorized in ordinary visitors, VIPs and press. The public are divided into rows with separate entrances. This allows for rapid checking of entrance tickets and visitations can take place without causing blockages.

We build customized entrance constructions for festivals like [Paaspop](#) and countless other events.

- Warm welcome
- First impression at an event
- Crowd control through system of separate entrances
