

Water pipe & cable bridge

At many [events](#) a temporary network of water pipes and electricity cables is installed. They sometimes have to cross a road (or other obstacle). We have a water pipe and cable bridge especially for this purpose. For [The Coolest Track in Holland](#), not a water but a cooling fluid pipe, which ensures a fine skating surface from outside the stadium.

The bridge comprises a construction of [Layher scaffolding material](#) and timber floor elements, finished with banners as desired.

See [KLM Open!](#)

- Safe infra for water pipes and electricity cables
